#### D. Low Stress Pipelines

A final rule on hazardous liquid pipelines operating at 20 percent or less of specified minimum yield strength (low stress pipelines), was published in the **Federal Register** on July 12, 1994. This rule became effective on August 11, 1994. Low Stress Pipelines include pipelines that carry highly volatile liquids (HVL), pipelines or pipeline segments in populated areas, and pipelines or pipeline segments in navigable waterways. Therefore, operators must incorporate these low stress mileage on the verification notice which were mailed to pipeline operators on or about November 30, 1994. Onshore rural gathering pipelines, pipelines that operate at less than 20% of SMYS (non-HVL located outside populated areas and navigable waterways), and other pipelines excluded from regulation by 49 CFR 195, should not be included.

Issued in Washington, DC on January 30, 1995.
